# INTRODUCTION

With great pleasure and enthusiasm, we take this opportunity to introduce our company, National Polystyrene Packaging Factory L.L.C. (N.P.P.F.) Dubai U.AE. We are proud to say that we are serving U.A.E. and G.CC. market since 1994 with excellent success.

Our goal is to exceed the expectations of every client by offering outstanding service, superior quality products adding greater value, thus optimizing system functionality and improving operational efficiency. Our associates are distinguished by their functional and technical expertise combined with their hands-on experience, thereby ensuring that our clients receive the most effective and professional service. Through continuous upgrading of facilities and applying "state of the art technologies" we are now one of the biggest EPS manufacturers in the Middle East.

NPPF manufactures and market all types of Polystyrene (Thermocol) Products which are related to Construction, Thermal Insulation, Geofoam, Packaging, Architectural works, and Decorations, that will suit customer's requirement.

# COMPANY STRATEGY

## MISSION

To provide premium products and services for expanded polystyrene industry in construction and packaging industry in the Middle East.

## VISION

To be the first choice supplier in polystyrene industry.

## QUALITY POLICY

It is our goal to provide superior quality products and services that will conform and exceed our valued customers' requirements and expectations. We strive for higher quality to achieve "Total Customer Satisfaction".

## ETHICAL BUSINESS POLICY

NPPF is committed to sustaining the higher standards of ethics to conduct the business legally and honestly. The company's attitude to all improper activities amongst its employees or anyone related will be of zero tolerance. The company believes in integrity and discourage dishonesty at all times.

## GREEN POLICY

NPPF is committed to minimizing the impact of its activities on the environment. The company concentrates on the 3Rs (Reduce Reuse Recycle) for actively promoting green rich atmosphere and surroundings on its behalf.

# COMPANY OBJECTIVES

- Provide complete customer satisfaction by producing the highest level of quality for products and services, on time, the first time at a competitive price.
- Continually strive to improve our capabilities and processes by introducing new technologies and thereby always remain the best value to our customer.
- Maintain an effective management and quality system in the form of an ISO 9001:2015 Quality Management System.
- Committed to the earth and environment with our sustainable solutions through continuous studies and researches, design and implementation.

## OUR MANAGEMENT SYSTEM COMPLIES WITH

BS OHSAS 18001  
2007 by Bureau  
Veritas Certification.

The first EPS Company  
to be a Corporate  
member of Emirates  
Green Building  
Council (EGBC)

ISO 9001:2015, by  
Lloyd's Register of  
Quality Assurance

The First EPS Company  
who got Emirates  
Authority for  
Standardization &  
Metrology (ESMA)  
mark.

ISO 14001: 2015 by  
Bureau Veritas  
Certification.

The Environmental Trustmark

The Trustmark for  
Environmental  
Performance

The First EPS  
Company  
who got Dubai  
Central Laboratory  
(DCL) certificate

# OUR PRODUCTS

---

## Expanded Polystyrene (EPS)

A closed cell and rigid foam based on polystyrene that is formed by expanding beads containing environmental friendly foaming agent. Polystyrene beads are expanded while processing them under heat and high pressure of hot water and steam. This makes the beads expand as much as 50 times their original size whereupon their surfaces will melt and weld together to form a rigid tenacious material taking the shape of the mould into which it is placed.

## ROOFKING

An Insulating board that is produced with state-of-art technology and fully automated injection molding machines with stringent quality control. This molded board is fire retardant and available in different thickness with shiplap joints. Can be used in roof, wall and floor insulation.

## EPS PALLETS

Our foam pallets are made out of specially molded Expanded Polystyrene (EPS) which are lightweight and durable with high load capacity than traditional wooden pallets.

EPS pallets are water resistant and are perfect for hygiene sensitive applications.

There are many advantages of EPS pallets. They are 100% recyclable & eco-friendly. EPS pallets offer better cost-performance ratio than wooden pallets due less fuel consumption and durability.

## PACKAGING

Molded EPS boxes and packaging are the best solutions for preserving & protecting products due to their intensive insulating quality and static composition. It is the best choice to pack and ship perishable goods, fragile items for moving location and protection to delicate electronic and medical equipment. Fresh, frozen foods such as fish, meat and vegetable can be kept cool and well preserved to maintain their freshness for a longer period of time regardless of the external environment in our produced boxes.

## KINGPOR

A grey color EPS Sheets that comes from the molded blocks, which are cut through CNC machine or manual wire cutting to the desired size of customer requirement. Thermal properties for this material are improved by 9% to 18%, compared to white EPS with reference to ASTM standard due to special carbon or graphite additive.

# APPLICATIONS

## Insulation using polystyrene

- Thermal insulation.
- Roof and floor
- Wall.
- Exterior Insulation and Finish Systems (EIFS)
- Insulating Concrete Forms (ICF).

## Acoustic insulation

- Acoustic and sound impact.

## Geofoam & landscaping

- Geofoam applications
- Road & bridge
- Earth works & structural fills.
- Foam works.

## Protective packaging & horticultural tray

- Fish boxes.
- Ice boxes.
- Vegetable and meat boxes.
- Loose beads .
- Styrofoam chips.
- Thermocol sheets.

## Art & Decoration

- Illustrative items.
- Event decorations, props.
- Cartoon character.
- Exterior design.
- Interior design .
- Interior and exterior Decoration.

## Agriculture

- Seedling trays.
- Flat trays, pots and hanging baskets.
- Horticulture.
- Ideal for floriculture & flowering plants.
- Small scale plant breeding.

## SOME OF OUR LATEST PROJECTS

- AD future school - Abu Dhabi
- Masjed al sheik Zayed al Kabeer - Abu Dhabi
- Al Shawamekh School - Abu Dhabi
- Siemens Headquarters - Abu Dhabi
